

DOST ACADEME TECHNOLOGY-BASED
ENTERPRISE DEVELOPMENT

DATBED

BRIEFER

Department of Science and Technology
**TECHNOLOGY APPLICATION AND
PROMOTION INSTITUTE**

The **DOST Academe Technology-based Enterprise Development (DATBED) Program** develops entrepreneurial competencies among students in selected academic institutions.

DATBED Stage I supports income-generating projects that are not yet tested in the market. These technological innovations must have high market potential and technical viability when commercialized.

On the other hand, DATBED Stage II continues to assist DATBED Stage I graduate-beneficiaries for the commercialization of their Stage I projects by providing financial assistance to the DATBED Stage I graduate-beneficiaries who have shown capability in managing the technology-based projects on their own.

ASSISTANCE COVERAGE

DATBED Stage I is open to all science-and-technology-based projects developed by the students and universities subject to the implementing guidelines of the school while DATBED Stage II is open to all science-and-technology-based projects assisted under DATBED Stage I.
